(54) Title: METHOD AND APPARATUS FOR DISPLAYING NUMBER OF VIDEO TITLES AVAILABLE AT POWER ON

(57) Abstract: An digital recording apparatus and a method for controlling a digital recording apparatus for allowing a user to quickly and easily determine a number of available programs stored on the recording apparatus. The present invention provides an initial on screen display in response to the receipt of a power ON command, placing the apparatus in a powered state, wherein the initial on screen display provides an indication of the number of available video programs stored on the apparatus. Alternatively, the initial on screen display may provide the number of video programs stored since the apparatus was last in the ON state, or the number of video programs stored since the user last accessed a full listing of stored programs.

### \* Special categories of cited documents:

- \*A\* document defining the general state of the art which is not considered to be of particular relevance
- \*E\* earlier document but published on or after the international filing date
- \*L\* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- \*O\* document referring to an oral disclosure, use, exhibition or other means
- \*P\* document published prior to the international filing date but later than the priority date claimed

- \*T\* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- \*X\* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- \*Y\* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
- \*G\* document member of the same patent family
